# Outline

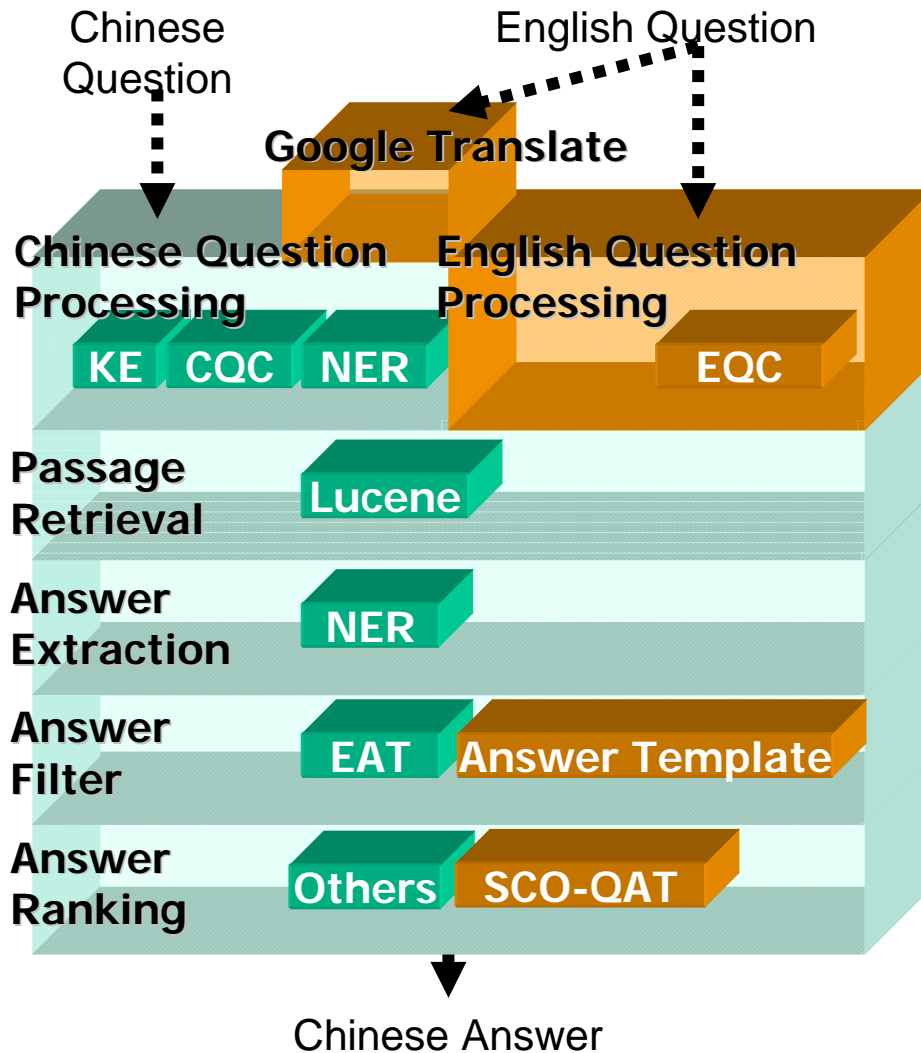

---

- Overview
- Major Extensions
  - English Question Classification
  - Answer Filtering with Answer Template
  - Answer Ranking with SCO-QAT Feature
- Error Analysis
- Conclusion

# Overview

- ASQA1 System (NTCIR5)
- ASQA2 System (NTCIR6) participated in C-C and E-C subtasks
- ASQA2 focuses on
  - Cross-lingual QA (EC)
  - Syntactic information
  - Global information
- Post-hoc evaluation of ASQA2 on NTCIR5 test set
  - C-C RU-Accuracy: 0.445 → 0.555
  - C-C R-Accuracy: 0.375 → 0.395

# ASQA<sup>2</sup> System (NTCIR6)

NTCIR-6 CLOA CC subtask:

- R-Accuracy: 0.52
- RU-Accuracy: 0.553

NTCIR-6 CLOA EC subtask:

- R-Accuracy: 0.253
- RU-Accuracy: 0.34

# Outline

---

- Overview
- Major Extensions
  - English Question Classification
  - Answer Filtering with Answer Template
  - Answer Ranking with SCO-QAT Feature
- Error Analysis
- Conclusion

# English Question Classification

- SVM
- Features for SVM EQC model
  - word bi-gram
  - first word
  - first two words
  - question wh-word
  - **question informer**
  - **question informer bi-gram**

# Question Informer for English Questions

- Answer type informer span (Krishnan et al. 2005)
  - *a short (typically 1–3 word) subsequence of question tokens that are adequate clues for question classification*
  - How much does an adult elephant weigh?
- Predicted by a Conditional Random Field (CRF) model
- Training data set (5,500 questions)
  - UIUC QC dataset (Li and Roth, 2002)
  - Question informer dataset (Krishnan et al., 2005)
- Features: Word, POS, heuristic informer, Parser Information, Question wh-word, length, position.
- 0.939 F-score

# Accuracy of English Question Classification by SVM

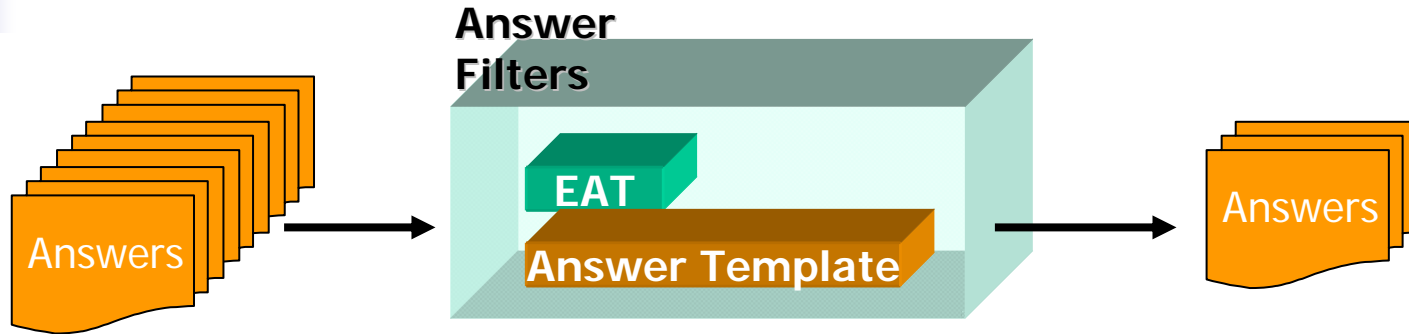

# Outline

---

- Overview
- Major Extensions
  - English Question Classification
  - Answer Filtering with Answer Template
  - Answer Ranking with SCO-QAT Feature
- Error Analysis
- Conclusion

# Answer Filters

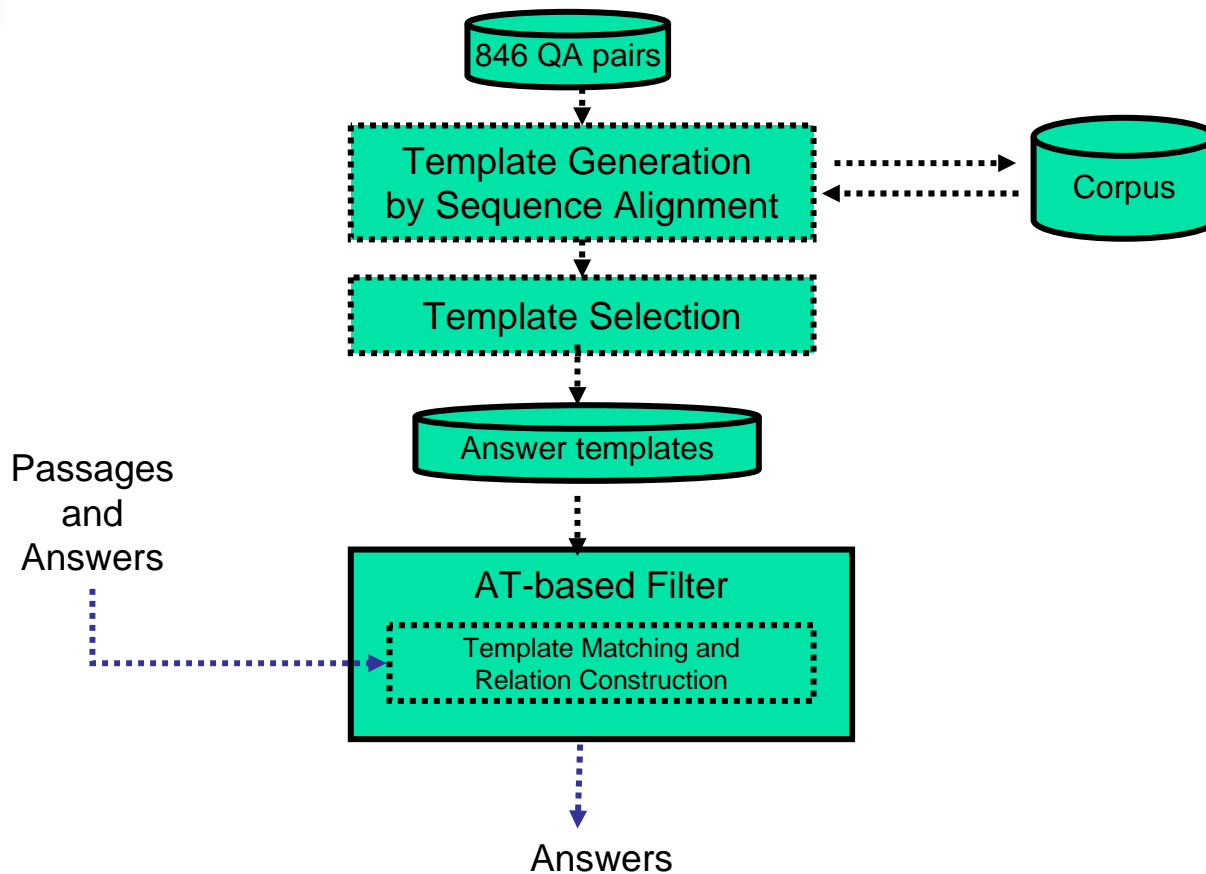

- Goal
  - Reducing the number of answers without damaging the upper bound of answer accuracy
  - Improving the performance of answer ranking since unrelated answers are removed
- EAT (Expected Answer Type) Filter
- AT-based Filter

# Answer Templates

- Syntactic patterns for capturing relations between question terms and answers
- Similar to Surface Patterns used in some QA researches
  - Trained from Question-Answer pairs
  - Gather passages by sending question keywords and the answer
- But different in some ways:
  - Generated by local sequence alignment
  - Not targeting to a specific question type
  - No bootstrapping

# Generate and Apply Answer Templates

# Templates generated by local alignment

- ..因/Cbb/O 台中縣/Nc/LOC 議長/Na/OCC 顏清標/Nb/PER 涉嫌/VK/O..  
 .. 清朝/Nd/O 台灣/Nc/LOC 巡撫/Na/OCC 劉銘傳/Nb/PER 所/D/O..  
 → LOC OCC PER (contains only Semantic-tag)
- 被/P/O 大陸/Nc/LOC 國家/Na/O 主席/Na/OCC 江民/Nb/O 形容為/VG/O..  
 /COMMA/O 香港/Nc/LOC 行政/Na/O 長官/Na/OCC 董建華/Nb/PER 近日..  
 俄羅斯/Nc/LOC 男子/Na/O 選手/Na/OCC 史莫契柯夫/Nb/O 在/P/O..  
 → LOC Na OCC Nb (template contains POS-tag)
- 由/P/O 建業/Nc/O 所長/Na/OCC 張龍憲/Nb/PER 擔任/VG/O  
 由/P/O 安侯/Nb/O 所長/Na/OCC 魏忠華/Nb/PER 擔任/VG/O  
 → 由 N 所長 PER 擔任 (template contains partial POS-tag, word)
- 在/P/O 卡達首都/Nc/LOC 多哈/D/PER,LOC 舉行/VC/O  
 於/P/O 國父紀念館/Nc/ORG - 舉行/VC/O  
 在/P/O 國父紀念館/Nc/ORG 廣場/Nc/O 舉行/VC/O  
 → P Nc - 舉行 (template with don't care '-')

Priority of template tag types  
 Word > Semantic-tag > POS-tag

# Template Selection

- Apply the generated templates to the retrieved passages of training questions
- If there is a passage of which the matched parts contains the answer and some question key terms (with semantic-tag, Nb, or verb), the template will be retained.
- 126 answer templates are selected

# Use Answer Templates to Filter Answers

Question:	女演員/OCC 蜜拉索維諾/PER 獲得/VJ 奧斯卡/Nb/ORG 最佳/A 女配角/OCC 獎/Na 是/SHI 因/Cbb 哪/Nep 部/Nf 電影/Na
-----------	---

Passage <sub>1</sub>	..... 而/Cbb 奪得/VC 一九九五/Neu 奧斯卡/Nb 最佳/A 女配角/OCC 的/DE 殊榮/Na ...
Template <sub>1</sub> :	VC Neu Nb A OCC - Na
Relation <sub>1</sub> :	{奪得/VC, 奧斯卡/Nb, 女配角/OCC}

Passage <sub>2</sub>	... 蜜拉索維諾/PER 在/O/P/O 「/O/PAR 非強力春藥/ART 」/PAR 中/Ncd ..... 獲/VJ 奧斯卡/Nb 獎/Na ...
Template <sub>2</sub> :	PER P PAR ART PAR -DE Na X VJ Nb
Relation <sub>2</sub> :	{蜜拉索維諾/PER, 非強力春藥/ART, 獲/VJ, 奧斯卡/Nb}

Relation <sub>3</sub> :	{奪得/VC, 奧斯卡/Nb, 女配角/OCC, 蜜拉索維諾/PER, 非強力春藥/ART, 獲/VJ}
-------------------------	--

- Only answers found in final relations are retained
- If there is no answer found in the relations, retain all the answers

# Answer Template Performance

- NTCIR6 CLQA C-C
  - Question Coverage: 37.3%
  - RU-Accuracy: 0.911
- NTCIR6 CLQA E-C
  - Question Coverage: 25.3%
  - RU-Accuracy: 0.632

# Outline

---

- Overview
- Major Extensions
  - English Question Classification
  - Answer Filtering with Answer Template
  - Answer Ranking with SCO-QAT Feature
- Error Analysis
- Conclusion

# Answer Ranking

- Answer score

$$\text{AnswerScore}(ans) = \sum_i w_i \cdot \text{feature}_i$$

- Local features: only use the information in the containing passage
- Global features: use information from all the returned passages

# SCO-QAT (Sum of Co-occurrence of Question and Answer Terms)

$$SCOQAT(ans) = \sum_{c \subset QTermCombination} \frac{Freq(c, ans)}{Freq(c)}$$

# SCO-QAT Example

Input Question  $Q$ : 誰是泰國總理 (Who is the prime minister of Thailand?)

Question Terms: 泰國 總理

2 Candidate Answers: 乃川, 史柏柴

4 Retrieved Passages =

泰國副總理史柏柴也指責避險基金及投機客加重亞洲金融危機。

泰國總理乃川計畫在未來十年中將軍方將領減少四分之三

泰國總理乃川今天諭令泰國駐印尼大使館，若印尼局勢惡化，應準備撤回泰僑事宜

泰國總理乃川已指示駐印尼大使館預先準備撤僑事宜，並為泰國僑民設立廿四小時

不....

$SCO-QAT(乃川) = F(乃川, 泰國)/F(泰國) + F(乃川, 總理)/F(總理) + F(乃川, 泰國, 總理)/F(泰國, 總理) = \frac{3}{4} + \frac{3}{4} + \frac{3}{4} = 2.25$

$SCO-QAT(史柏柴) = \frac{1}{4} + \frac{1}{4} + \frac{1}{4} = 0.75$

# SCO-QAT RU-Accuracy on NTCIR-5 test data

NTCIR-5 C-C

NTCIR-5 E-C

# Outline

---

- Overview
- Major Extensions
  - English Question Classification
  - Answer Filtering with Answer Template
  - Answer Ranking with SCO-QAT Feature
- **Error Analysis**
- Conclusion

# Error Analysis of ASQA2 at NTCIR-6

- C-C
  - Answer Ranking (28.6%)
  - Question Classification (19.0%)
  - Time Constraint (15.9%)
  - Others
- E-C
  - Wrong Translation (37.9%)
  - Answer Ranking (20.4%)
  - Synonym (10.7%)
  - Others

# Conclusion

---

- We have successfully built an EC QA system by enhancing the CC version with *Google translate* and EQC
- In both C-C and E-C subtasks
  - Syntactic information is helpful (Answer Template)
  - Global information is helpful (SCO-QAT)
