Contents

1 Introduction **1**

1.1 Program Calculation . . . 2

1.2 Contributions of the Thesis . . . 4

1.3 Organization of the Thesis . . . 6

2 Preliminaries **7**

2.1 Functional Programming . . . 7

2.1.1 Expressions and Values . . . 8

2.1.2 Types . . . 8

2.1.3 Functions and Definitions . . . 8

2.2 Constructive Algorithmics . . . 10

2.2.1 Category Theory . . . 11

2.2.2 Data Type Theory . . . 15

2.2.3 Functions over Data Types: Cata, Ana, Hylo . . . 18

3 Towards Calculation: Deriving Hylomorphisms **23**

3.1 A Simple Language . . . 24

3.2 Expressing Recursions as Hylomorphisms . . . 26

3.2.1 Main idea . . . 26

3.2.2 Algorithm for Deriving Hylomorphisms . . . 28

3.2.3 Examples . . . 29

3.3 Related Work and Discussions . . . 31

4 Calculating Fusion Transformation **32**

4.1 Fusion in Calculational Form . . . 33

4.2 Structural Hylomorphisms . . . 34

4.2.1 Suitable Hylomorphisms for Hylo Fusion Theorem . . . 34

4.2.2 Suitable Hylomorphisms for Acid Rain Theorem . . . 35

4.3 Algorithm for Structuring Hylomorphisms . . . 37

4.4 Examples 40

4.4.1 Fusion with the Acid Rain Theorem 40

4.4.2 Fusion with Recursions over Multiple Data Structures 42

4.5 Conclusion 43

5 Calculating Tupling Transformation **44**

5.1 Examples: Inefficient Recursions 46

5.1.1 Multiple Traversals of Data Structures 46

5.1.2 Redundant Recursive Calls 47

5.1.3 Unnecessary Traversals of Intermediate Results 47

5.2 Cheap Tupling Rules in Calculational Form 47

5.2.1 Eliminating Multiple Data Traversals 49

5.2.2 Eliminating Redundant Recursive Calls 51

5.2.3 Removing Unnecessary Traversals of Intermediate Results 54

5.3 Cheap Tupling Strategy 55

5.4 Related Work and Discussions 57

5.5 Conclusions 58

6 Calculating Accumulations **59**

6.1 Accumulations and Catamorphisms 60

6.2 Derivation of Accumulations 62

6.3 Manipulating Accumulations 67

6.4 An Application 69

6.4.1 Specification 70

6.4.2 Program Derivation 71

6.5 Related Work and Conclusions 73

7 Calculating Monadic Programs **75**

7.1 Monadic Programming 76

7.1.1 Monads 76

7.1.2 An Example of Programming with Monads 77

7.2 Theory for Manipulating Monadic Programs 79

7.2.1 The Base Category for Monadic Catamorphisms 79

7.2.2 Category of Monadic F-Algebras 80

7.2.3 Monadic Catamorphisms 82

7.3 An Example 84

7.4 Conclusion and Future Work 86

8 Calculating Parallel Functional Programs **87**
8.1 Almost Homomorphisms . . . 89
8.2 Specification . . . 89
8.3 Derivation . . . 91
8.3.1 Deriving Almost Homomorphisms . . . 91
8.3.2 Fusion with Almost Homomorphisms . . . 93
8.4 Concluding Remarks and Related Work . . . 96

9 Concluding Remarks **98**

Bibliography **100**

Publication List (1996–1994) **107**
