WeWantWeb@NTCIR

# Why “We Want Web”?

- IR tasks have diversified, and good old-fashioned ad hoc IR tasks have disappeared.
- Ad hoc IR may have reached a plateau in the ‘90s, but we need a stable evaluation environment for breakthroughs!
- In particular, we want to design and improve web search algorithms that are not just black boxes.

Djoerd Hiemstra  
@djoerd

Following

Yesterday's protesters at [#TREC](#): We want the web track! We want it now!

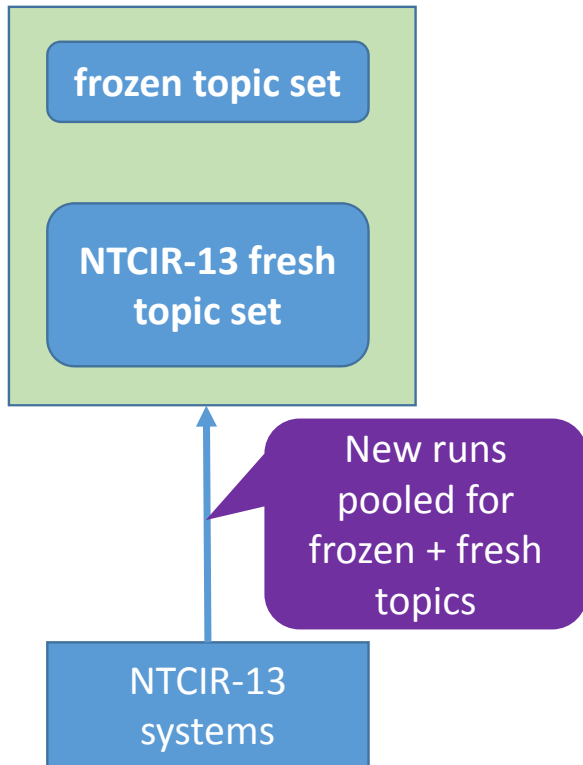

# Task design

- An ad hoc web search task, which we plan to continue for at least three rounds (NTCIR 13-15).
- Some user behavior data will be provided to improve search quality.
- Evaluation measures: traditional measures like ERR, nDCG, Q-measure plus novel measures (e.g. U-measure which takes into account snippet and document lengths, ones that take into account the informational/navigational distinction)
- English and Chinese subtasks for NTCIR-13 (+Japanese for NTCIR-14)
- Collective failure analysis at a pre-NTCIR-13 workshop

# We Want Web@NTCIR-13 (2)

NTCIR-13 (Dec 2017)

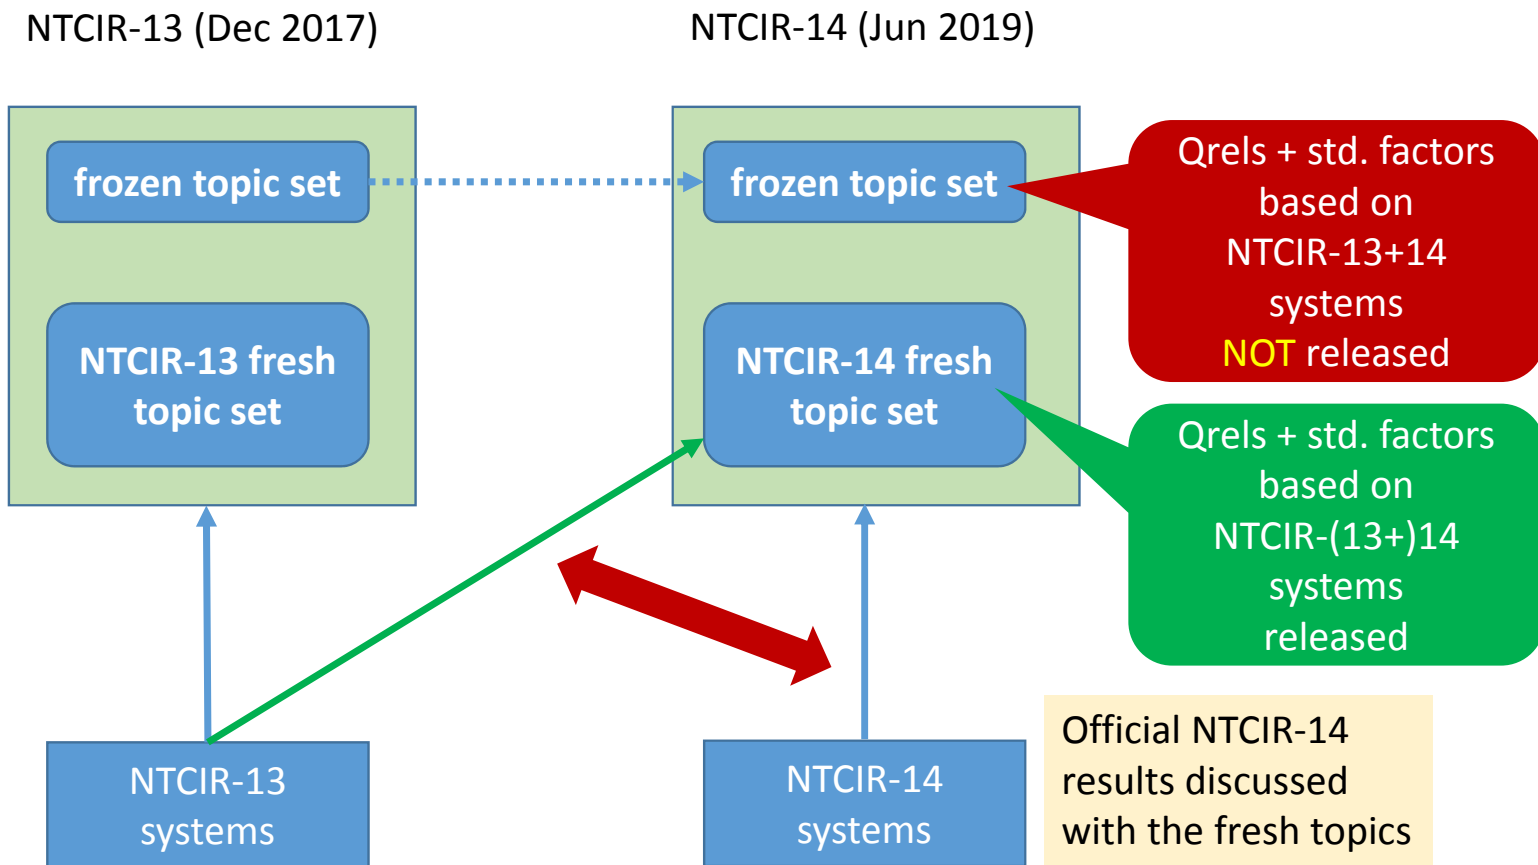

# We Want Web@NTCIR-14 (1)

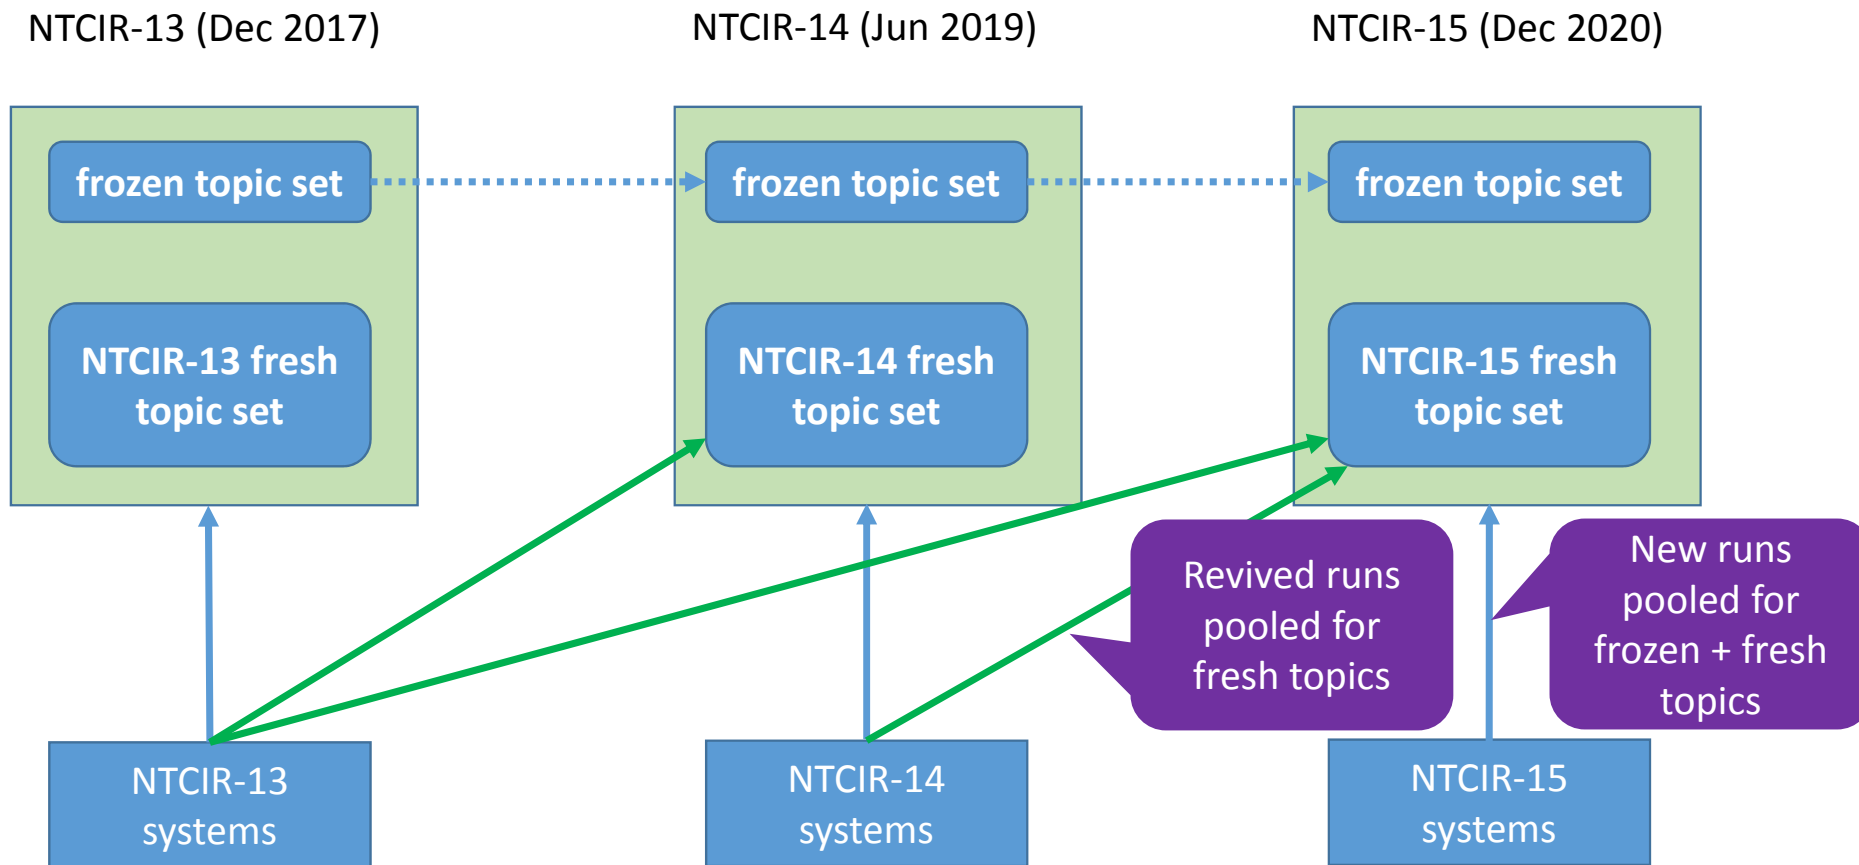

# We Want Web@NTCIR-14 (2)

Using the NTCIR-14 fresh topics, compare new NTCIR-14 runs with revived runs and quantify progress.

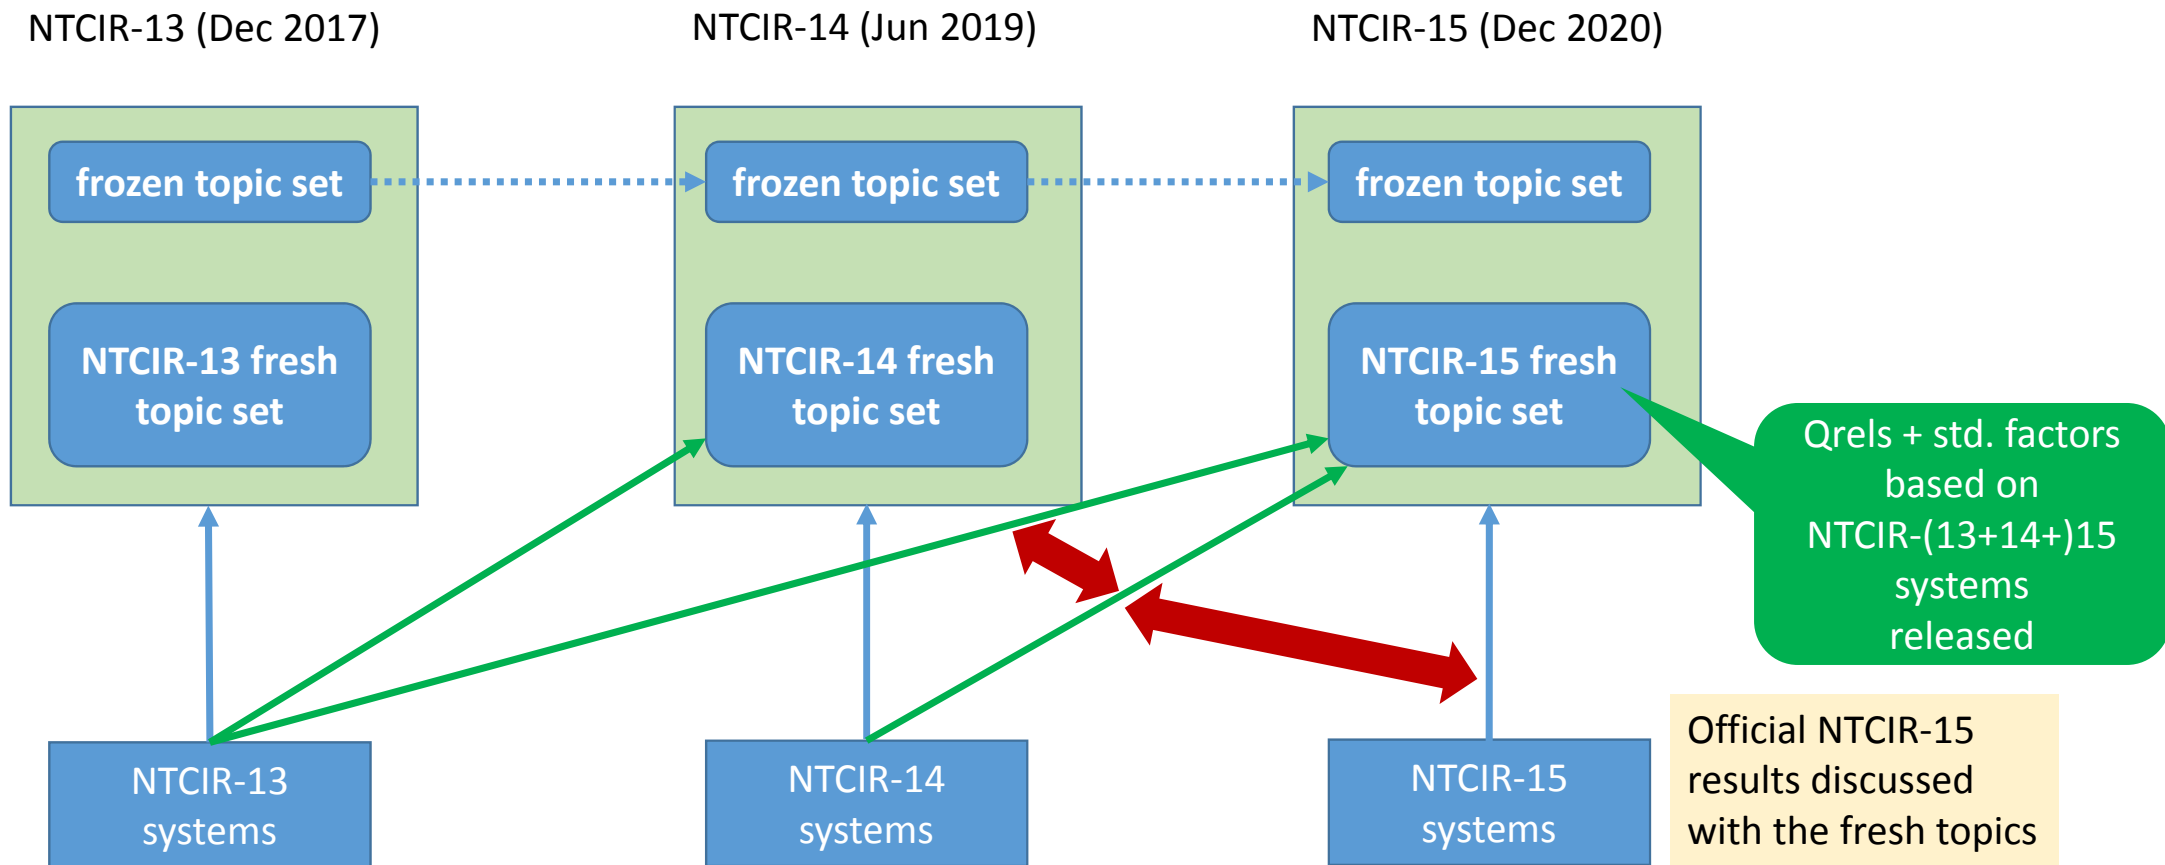

# We Want Web@NTCIR-15 (1)

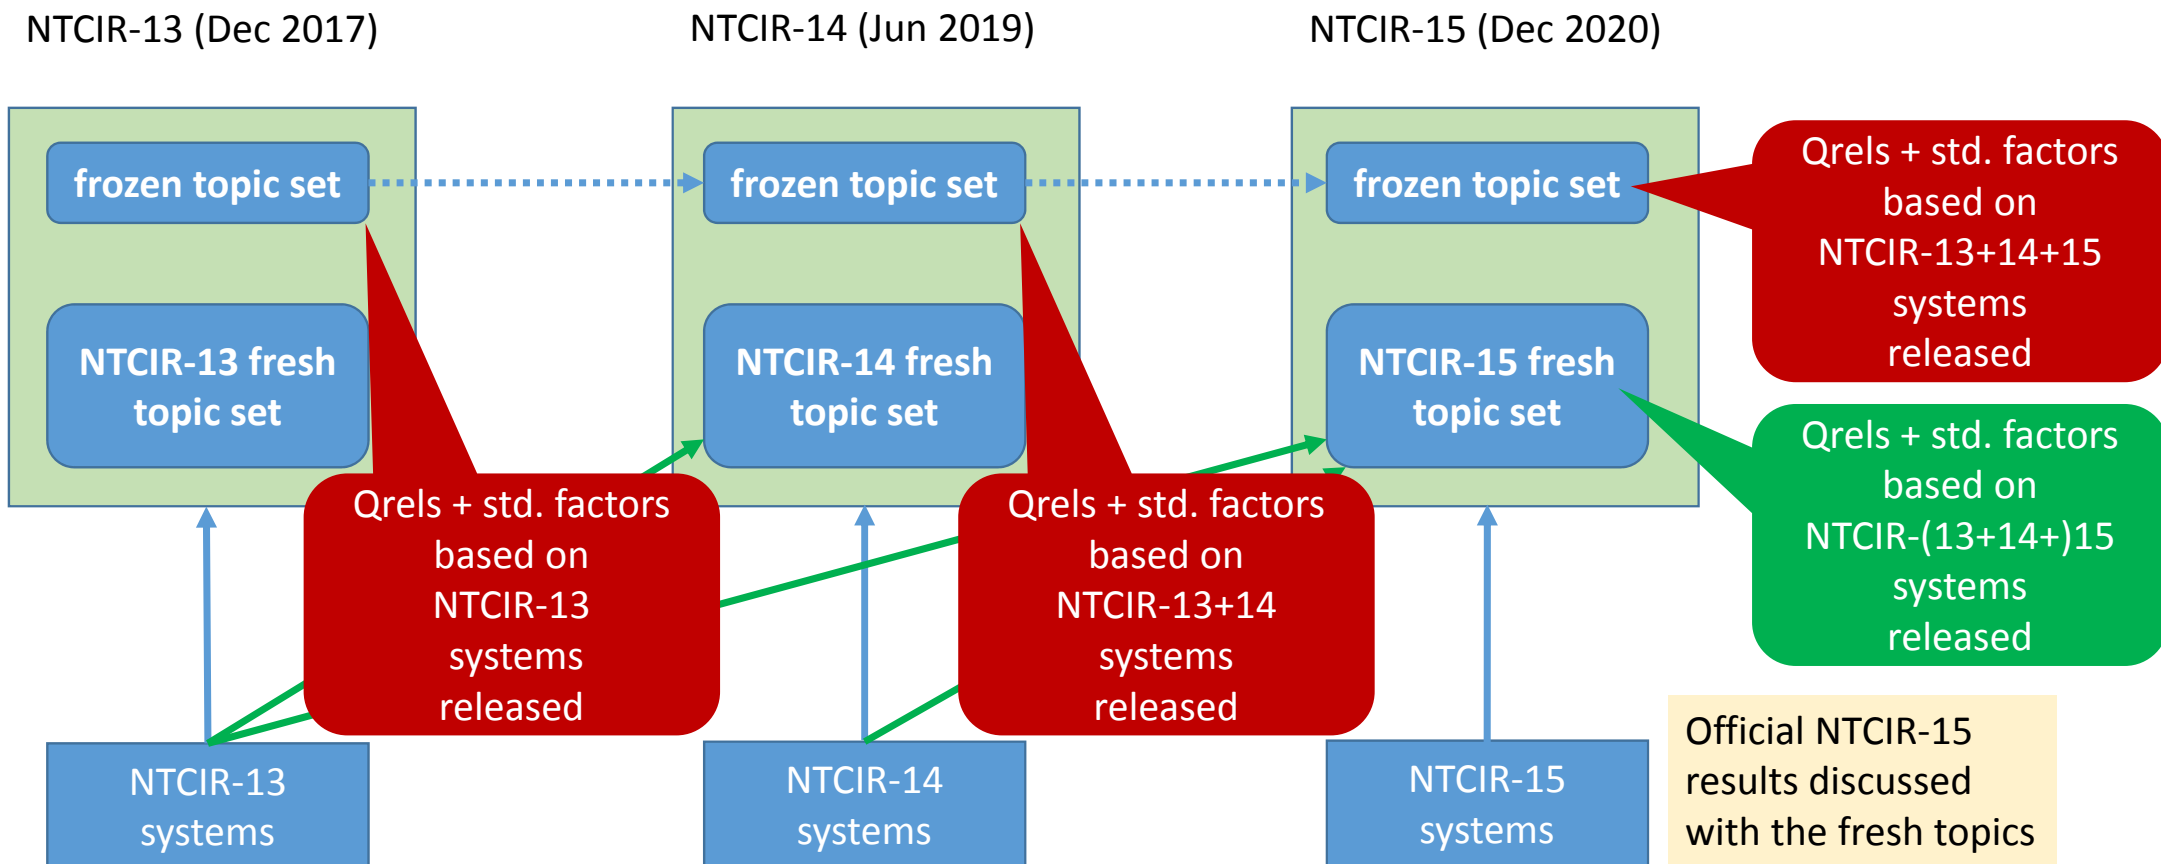

# We Want Web@NTCIR-15 (2)

Using the NTCIR-15 fresh topics, compare new NTCIR-15 runs with revived runs and quantify progress.

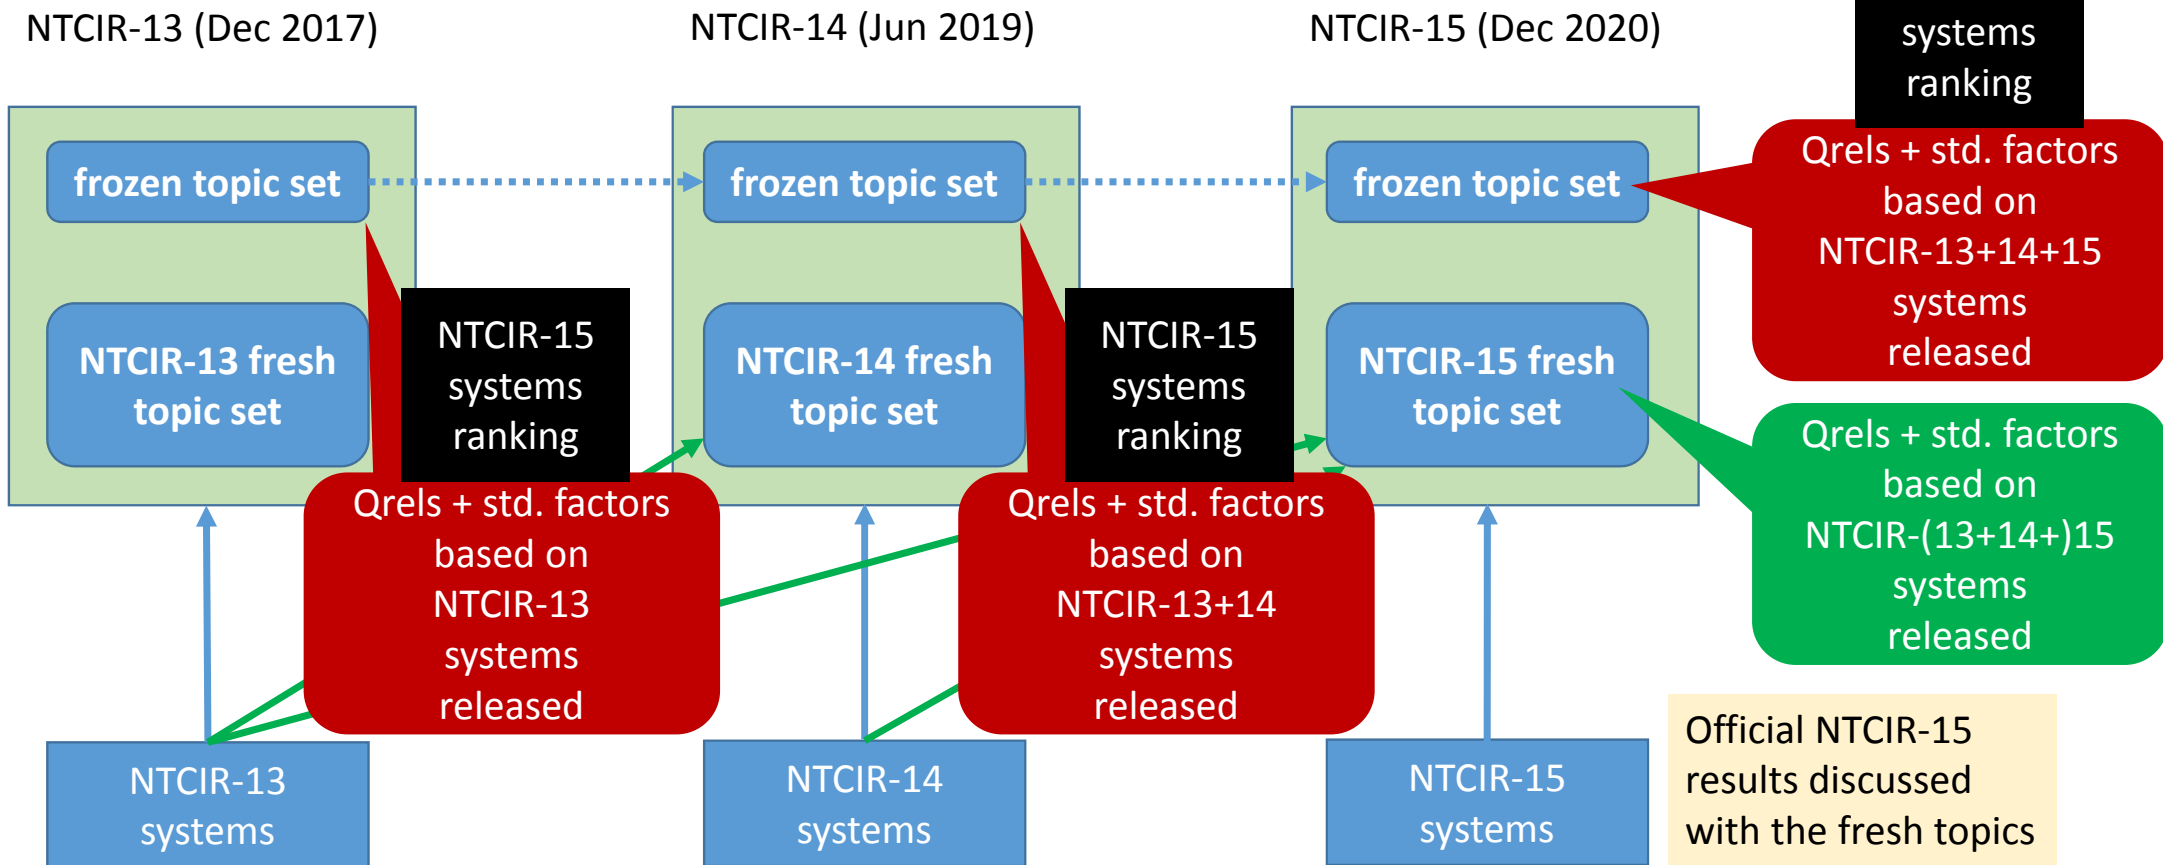

# We Want Web@NTCIR-15 (3)

How do the standardisation factors for each frozen topic differ across the 3 rounds?

# We Want Web@NTCIR-15 (4)

How do the NTCIR-15 system rankings differ across the 3 rounds, with and w/o standardisation?

# Highlights of We Want Web@NTCIR

- **Easy** to participate – it's an ad hoc web task!
- **New** Sogou-Q/Sogou-T (2016) datasets provided to participants!
- **Long-term** monitoring and quantification of improvements
- **User-centric** evaluation explored by leveraging user behaviour data
- **Collective** effort on failure analysis, not just mean performances

# Tentative timeline

~~Jul-Aug 2016 Corpora released to registered participants~~ ✓ SogouT/Q is ready!

Aug-Sep 2016 Designing and constructing topics

Oct 2016-Jan 2017 User behavior data collected for the topics

Feb-Mar 2017 User behavior data released to registered participants

Apr 2017 Task registrations due

May 2017 Topics released; runs received

Jun-Jul 2017 Relevance assessments

Aug 2017 Results released to participants

Sep 2017 Draft participants papers due

Nov 2017 Pre-NTCIR WWW Workshop on Failure Analysis in Beijing

Dec 2017 NTCIR-13 Conference

# Organisers

- Cheng Luo, Yiqun Liu (Tsinghua University)
- Tetsuya Sakai (Waseda University)
- Zhicheng Dou (Renmin University of China)
- Jingfang Xu (Sogou, Inc.)
