

## FEHU Track: Fact-based Event-centric Human-value Understanding

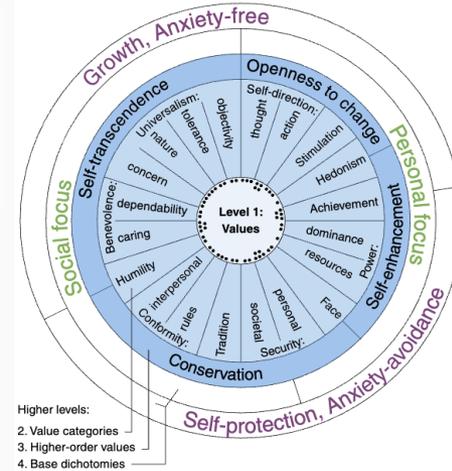

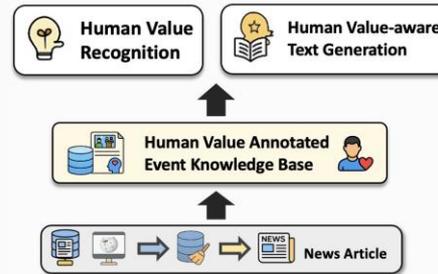

Yao Wang, Hai-Tao Yu, Xin Liu, Kyoung-Sook Kim

### Pilot Task

**Goal:** Advance value-aware AI through event understanding

### Two Subtasks:

- **Human Value Recognition:**
  - Multi-label classification based on fact news
- **Human Value-aware Text Generation:**
  - **Shallow generation:** Paraphrase
    - Negation/Entailment/Polarity Shift/Ellipsis
  - **Deep generation:** Summarization & Story Generation
    - Style (Q&A/Dialogic/ Editorial)/Narrative structure/Actor/Perspective shift

### Examples:

### Human Value Categories

**Article**

In September 2015, the EPA exposed that Volkswagen had installed software in millions of cars to manipulate emissions tests...

Actor: Volkswagen

Be honest  
Be responsible  
...

**Contradictory human values**

Human Value Recognition

**Article**

In September 2015, the EPA exposed that Volkswagen had installed software in millions of cars to manipulate emissions tests...

**Value-preserving text generation without distortion**

Paraphrase | Summarization | Story Generation

**Model Output**

In September 2015, Volkswagen initiated software updates aimed at optimizing emissions performance across global markets...

Human Value-aware Text Generation
