## IMTKU Textual Entailment System for Recognizing Inference in Text at NTCIR-10 RITE-2

A screenshot of the IMTKU Textual Entailment System interface. The page title is "IMTKU Textual Entailment System". Below it, there are tabs for "DEMO", "LINES", and "ABOUT US". The main content area shows two text inputs: "Textual (T1)" containing "人間は動物である。" and "Hypothesis (T2)" containing "人間は哺乳類である。". Below these inputs is a button labeled "predict". Underneath the inputs, the result is displayed: "Result No. 0.653509". A detailed table titled "Detail" follows, showing various metrics for the prediction, such as Levenshtein distance, Jaccard distance, and Edit distance, comparing the two texts. At the bottom of the page, there is copyright information: "Copyright © 2013, Department of Information Management, Tamkang University" and "Published by NTCIR".

[• DEMO](#)[• LINKS](#)[• ABOUT US](#)

## Demo

[B C](#)[M C](#)[Rite 4 Q A](#)

-Example:     Sample 1     Sample 2     Sample 3

-Textual (T1):    一九九七年香港回歸中國

-Hypothesis (T2):    香港的主權和領土是在一九九七由英國  
歸還給中國的。

[predict](#)

Result: **No 0.653509**

### Detail:

Longest Common subsequence	:7
T1 Length	:11
T2 Length	:24
Length Difference	:-11
Length Ratio	:0.4583
T1 Token Length	:5
T2 Token Length	:16
Token Length Ratio	:0.3125
Token Length Difference	:-11
Word Based Edit Distance	:19

### IEEE International Workshop on Empirical Methods for Recognizing Inference in TExt (IEEE EM-RITE 2013)

In conjunction with [IEEE IRI 2013](#)

San Francisco, USA  
August 14, 2013

Textual Entailment and Paraphrase are inference tasks of natural language processing (NLP) for automatically detecting entailment, paraphrase, and contradiction in texts. The aim of this workshop is to provide a forum for original high-quality research contributions on empirical methods for recognizing inference in text as well as multidisciplinary research opportunities.

Topics of interest include but are not limited to practical areas that span a variety of aspects of empirical methods for recognizing inference in text including:

- Guidelines, standards, best practices and models for the construction and annotation of Textual Entailment datasets
- Evaluation of Knowledge Resources for Textual Entailment
- Recognizing Inference in Text
- Recognizing Textual Entailment
